***Allowable Subject Matter***

1. Claims 1-15 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 limits the formation of a Schotkey diode to etching through two insulative layers (having different etch rates) in a single etch step and producing a window (contact hole, via) that has a topology of stepped thickness (stepped contour). This limitation, in combination with the other limitations of claim 1 is not taught or suggested by the prior art of record. Ito (JP 62-269359) etches through two insulative layers of different etch rates, but fails to teach or suggest a single etch step. Hsieh (US005258640A), Baliga (US 4,717,679), and Murakoshi (US006403452B1) teach multiple etch steps to achieve a stepped structure. Saxena (US 3,694,719) forms a stepped structure in a single insulative layer using multiple etch steps. Kinzer (US005886383A) and Pfeleiderer (US 4,760,035) form a stepped structure by forming a conformal layer over a step layer.

Claims 2-15 are allowed as being properly dependent upon allowed claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David S. Blum whose telephone number is (757)-272-1687) and e-mail address is David.blum@USPTO.gov .
